Lab 7

Assignment 1

Implement “**Add new Category**” and “**Add new Product**” features using **React Hook Form** to manage and validate data fields.

Guidelines:

- The category name, product name should not be null.
- The product price and quantity should not be null and should only accept number.
- Display custom warning when the user violates the rules.
- Use `console.log()` to display the submitted information.

Assignment 2

Write code to authenticate and authorize a user. Once authenticated, the user's name will be displayed in the app header. If the user has admin permissions, they can access admin pages.

Guideline:

- Use `useReducer` to manage state.
- Use `React Context` to share state across components.

Assignment 3

Integrate the shopping cart component from Lab 4 into the shopping cart page and complete the feature.

Guideline:

- Use `useReducer` to manage state.
- Use `React Context` to share state across components.
