Add to Cart

Shopping Cart

Headphones - \$100 x 1

Remove

+

-

Phone - \$500 x 2

Remove

+

-

Total: \$1100

Clear Cart

Assignment 2

Use the **MUI Data Grid** and **AG Grid** components to display a product list. Each product should have **6 properties**: ID, title, image link, price, quantity, and category.

Note: Students should create a list with **at least 6 products** to be displayed in the table.

Assignment 3

- Write HTML code for main section of News Category page using Tailwind.
- Use **React Router** to set up routing for the **VOW website**, including the following pages:
Home (/), Product Category (/products), News Category (/news), Dashboard (/admin),
Category Management (/admin/categories), and Product Management (/admin/products).

Assignment 4

- Install **React Toastify** and configure two notification types: a success message and a delete confirmation. The **success message** should trigger when the “**Add Category**” button is clicked, and the **delete confirmation** should appear when the “**Delete Category**” button is clicked.
